

Quick Installation Guide V1.0.0

NOTE

- Please make sure the mounting surface is strong enough to hold at least three times of the camera weight.
- For wooden mounting surface, expansion bolts are optional.

Model A

NOTE

You can adjust zoom and focus with a screwdriver.

Model B

Locking screw

Locking screw

Model C

The diagram illustrates the disassembly of the device from the enclosure. It shows the following components and steps:

- Mounting Surface:** The surface where the device is mounted.
- Expansion Bolt:** The bolt used to secure the mounting surface.
- Pedestal:** The base of the device.
- Self-tapping Screw:** The screw used to secure the pedestal.
- Device:** The main unit being disassembled.
- Enclosure:** The protective housing for the device.
- Disassembly Sign:** A sign indicating the disassembly point.
- Sign:** A sign indicating the disassembly point.

Model E

The diagram illustrates the assembly of Model E mounting hardware. On the left, a perspective view shows a dome-shaped device being inserted into a semi-circular enclosure. Two locking screws are shown on the enclosure, with curved arrows indicating they are used to clamp the device in place. On the right, an exploded view shows the components from top to bottom: a mounting surface with a pre-drilled hole, an expansion bolt, a pedestal, three self-tapping screws, the device, and the enclosure. The enclosure also features two locking screws.

Locking Screw

This diagram illustrates the exploded view of the mounting assembly. The components are labeled as follows:

- Mounting Surface
- Expansion Bolt
- Pedestal
- Self-tapping Screw
- Device
- Enclosure
- Fixing ring

Model G

The diagram illustrates the assembly of Model G. It shows an exploded view of the components and the sequence of assembly steps indicated by arrows.

Components and Assembly Steps:

- Mounting Surface:** The base surface where the device is mounted.
- Positioning Map:** A map used to align the device on the mounting surface.
- Expansion Bolt:** A bolt used to secure the pedestal to the mounting surface.
- Pedestal:** The base structure that supports the device.
- Self-tapping Screw:** A screw used to secure the device to the pedestal.
- Device:** The main unit being installed.
- Enclosure:** The protective cover for the device.
- Locking Screw:** A screw used to secure the enclosure to the device.

The assembly sequence is as follows:

- Position the **Positioning Map** on the **Mounting Surface**.
- Secure the **Pedestal** to the **Mounting Surface** using **Expansion Bolt**.
- Attach the **Device** to the **Pedestal** using **Self-tapping Screw**.
- Attach the **Enclosure** to the **Device** using **Locking Screw**.
