Product Overview

This series product is 4-Port/8-Port 100M PoE+ 2-Port 100M RJ-45 Ethernet Switch.

This series switch provides 4/8 100M Ethernet RJ-45 downlink ports and 2 100M Ethernet RJ-45 uplink ports. All RJ-45 downlink Ethernet ports support Power-over-Ethernet (PoE+) and deliver up to 30W power per port.

The switch supports 3 working modes through DIP switch: Default, VLAN and CCTV. Under VLAN and CCTV mode, it supports PoE watchdog features, which can detect and restart the camera automatically if it's frozen. It can be widely used in video security monitoring systems, network projects, etc.

This series contains two types:

- 4-Port 100M PoE+ 2-Port 100M RJ-45 Ethernet Switch (Short for 4-Port PoE Switch)
- 8-Port 100M PoE+ 2-Port 100M RJ-45 Ethernet Switch (Short for 8-Port PoE Switch)

Indicators

Indicators	Status	Descriptions
Power	On	Power supply is on
	Off	Power supply is off.
Link1~4/8	On	The port is linking normally.
	Blink	The port is transmitting or receiving data.
	Off	The port links down.
PoE1~4/8	On	The port is supplying PoE normally.
	Off	The port stops supplying PoE.
Link5~6/9~10	On	The port is linking normally.
	Off	The port links down.

DIP Switch

The support supports three working modes through DIP switch.

Interfaces	Descriptions
Default	All ports are free to communicate, transmission distance: 0~100m.
VLAN	Downlink ports are isolated from each other, but can communicate with uplink ports. Transmission distance: 0~100m. Under this mode, the PoE watchdog function is enabled.
CCTV	The transmission distance is extended up to 250m, but the rate is limited to 10Mbps. Under this mode, the PoE watchdog function is enabled.

Installation Steps

- 1) Before installation, power off the equipment. Installation when device is powered on is prohibited.
- 2) The switch supports desktop installation. Carefully put the device upright on the workbench.
- 3) Use Cat5 or better cable to connect the switch and the devices.
- 4) Check the installation and the wiring, after confirming that the connection is correct and reliable, power on the switch.

The installation is completed.

CAUTION

- Power on the system only after confirming that the wiring is correct, to avoid damage to the equipment. It is recommended to use the power adapter and AC power cable to in the package to connect the power supply.
- For better transmission performance, it is recommended to use Cat5 or better cables to connect the switch and powered devices.
- For better protection performance, it is recommended always to make the ground connection first and disconnect it at the end when operating the device.
- Each PoE RJ-45 port can provide a maximum power of 30W for a powered device. Please do not connect to a powered device with a power exceeding 30W.
- Before operating or maintaining the switch, please read the user manual carefully to avoid equipment damage caused by misoperation.
